

François Girard, Program Advisor for Hydrogen Technologies at the National Research Council Canada

François Girard is the Program Advisor for Hydrogen Technologies at the National Research Council Canada. With over 25 years working in the sector, he provides strategic and expert technical support to NRC's research programs, its Climate Action Strategy as well as supporting other government organizations and industry. He was one of the contributors to the creation of Canada's Hydrogen Strategy released in December 2020, and he is involved in various national and international committees and organizations. François has been on the Board of Directors of the Canadian Hydrogen Association since 2017. He was the Vice-Chair and then Chair of the Board for the Canadian Hydrogen Association between 2019 and 2021
