

Mark Coffin, CEO of Tronosjet Maintenance Inc.

Mark has over 25 years of working experience in aerospace, initially in aircraft maintenance, then as a commercial pilot and ultimately returning to aircraft maintenance in his current role as CEO of Tronosjet Maintenance Inc. Mark has operated and managed several aviation related businesses and personally held multiple Transport Canada operators' certificates in the course of his time in aviation. During the past 17 years Mark has overseen aircraft sales and acquisitions all around the globe, as well as heavy maintenance and modification work that takes place at the Tronos facility in Summerside PEI. In 2016, Tronos opened one of the most advanced manufacturing facilities in Eastern Canada, which includes polymer and metallic additive manufacturing (3D printing) as well as precision CNC machining for aerospace and space applications.
