

Bradley Schroeder

Director of Engineering

KF Aerospace

Director of Engineering at KF Aerospace. Transport Canada delegate as part of KF Aerospace DAO 05-V-01 with a specialty in Structures\Interiors\Mechanical Systems.

I have been at KF Aero for nearly 25 years and have moved to increasing responsibility within the engineering department. We are primarily focused on modification design and approval for narrowbody transport category aircraft.

My experience ranges from Type Certificate modification and obsolescence design work, modification design and approval for small and large scope projects.

The design projects range from interior layout changes, seat and monument changes to extensive cabin overhauls including cargo/passenger combi aircraft modifications. My role includes all aspects from initial design through, substantiation report generation, certification testing and TCCA delegate approval.
