

Nour Eid - Head of Strategy
Aerospace Technology Institute

Nour is the ATI's Head of Strategy and joined the institute in 2017. Nour looks after the ATI's long-term objectives and establishes how best to maximise the ATI's impact for the UK. Nour provides a framework for how we engage with the aerospace supply chain, and how we ensure that the ATI's strategy aligns with the requirements of the sector

Over his time at the ATI, Nour has worked in several roles, most recently developing the strategic and commercial elements of the Hydrogen Capability Network. Prior to that Nour was part of the innovation team who developed the ATI Hub- supporting collaborative innovation in the sector.

Nour is a chartered engineer who graduated from Imperial College London with a first-class Master's degree in Aeronautical Engineering. Before joining the ATI, Nour was technical lead in the weight estimation and control team at Airbus in Filton. Nour was responsible for the evolving wing weight of the A350 and liaised with international suppliers to manage their work packages. Nour also led weight-saving campaigns for the A380 and A350 performance improvement programmes. Nour was seconded to Toulouse, where he provided engineering support to the A350 final assembly line. He was also seconded to British Airways to support the engineering team at London Heathrow.

Aside from writing strategies and visiting manufacturing floors, Nour is also a DJ and producer with a passion for all things house and electronic. He has played in some of the biggest clubs in London and has played in more exotic locations with past gigs in Miami, Corfu and Sydney.
